

JBL® ONBEAT RUMBLE™

Wireless speaker dock featuring a built-in 4-1/2" (114mm) subwoofer and Lightning connector dock for iPhone 5 and iPad mini

Your iPhone 5 and iPad mini are ready to perform – now how loud do you want them?

The new iPhone 5, iPad mini and other wireless devices are awesome – if they're used to their full potential. The JBL® OnBeat Rumble™ speaker dock is *Bluetooth*®-enabled (with HARMAN TrueStream connection technology), and its built-in subwoofer delivers massive JBL sound with roaring bass from your portable players. Whether your device is docked on its Lightning connector or streaming wirelessly, you'll get thunderous sound when listening to music, watching videos, playing games or doing FaceTime video calling with friends. Download the free MusicFlow™ app and use your device to browse music, edit playlists and dial in your EQ settings.

Highlights

- Oversized, down-firing subwoofer
- 50 watts of amplifier power
- Lightning connector for iPhone 5 and iPad mini
- Wireless audio streaming
- HARMAN TrueStream technology
- Slipstream port technology
- Dock charger for Lightning-equipped devices
- Free MusicFlow app
- Works with the popular djay app
- Auxiliary input for additional sources
- Wide frequency response

Hear the truth.

JBL® ONBEAT RUMBLE™

Give your iPad mini and iPhone 5 the power to play out loud

Key Features

Oversized, down-firing subwoofer

No party is complete without deep, resounding bass. The JBL® OnBeat Rumble™ speaker dock features a 4-1/2-inch (114-millimeter), down-firing subwoofer that delivers big, bad, low-distortion bass to keep everyone dancing all night long.

50 watts of amplifier power

The JBL OnBeat Rumble speaker dock is ready to bring the house down. It delivers sound so big, everyone will know right away that you're rocking JBL speakers. The versatile dock offers 50 watts of amplification – more than enough to make your party bounce.

Lightning connector for iPhone 5 and iPad mini

This powerful loudspeaker includes the new Lightning connector, so it docks – and rocks – the iPad mini, iPad (4th generation), iPhone 5, iPod touch (5th generation) and iPod nano (7th generation). With big, bad JBL bass and the latest Apple functionality, you get both thunder and Lightning.

Wireless audio streaming

Enjoy your music with high-quality AAC *Bluetooth* streaming. We've designed the JBL OnBeat Rumble loudspeaker to dock your iPhone 5 and iPad mini, but it also works with the full-size iPad and virtually any other audio player that uses *Bluetooth* technology.

HARMAN TrueStream technology

HARMAN TrueStream tech guarantees the best possible listening experience when you stream audio via *Bluetooth* wireless connection. Our products always use the most current, most advanced wireless-technology option to ensure the highest-quality sound, no matter what application or source device you use.

Slipstream port technology

Proprietary Slipstream port technology in the JBL OnBeat Rumble dock gives listeners powerful, great-sounding bass with low distortion. Whether your entertainment source is docked or streaming, you'll experience bass that you can really feel – without unwanted boominess.

Dock charger for Lightning-equipped devices

The JBL OnBeat Rumble speaker dock works seamlessly with your iPhone 5, iPad mini and other Lightning-equipped Apple devices. The dock also charges the devices, which means that when you're ready to undock and take on the day, so is your favorite entertainment source.

Free MusicFlow app

With our sleek and streamlined MusicFlow app, which is free to download from the Apple App Store, you can browse your music in Cover Flow format, create and edit playlists as well as add songs to your favorites list. The MusicFlow app even gives you additional EQ modes so you can tweak your JBL OnBeat Rumble dock to make it sound just right in any room or environment.

Works with the popular djay app

Install Algoriddim's djay app to transform your iPad or iPad mini into a lifelike DJ mixing table. Whether you're streaming wirelessly or via the included USB cable, just place your device on top of your JBL OnBeat Rumble dock, and start cutting it up like a pro. When your device is connected to the dock, the djay app will even customize itself to give you a stand-alone JBL experience.

Auxiliary input for additional sources

Whether your source device is *Bluetooth*-enabled or not, the JBL OnBeat Rumble speaker dock allows you to take full advantage of incredible JBL sound, thanks to the dock's auxiliary-input (aux-in) connector. You can plug in practically any audio device, including a smartphone, tablet, laptop computer or an MP3 player.

Wide frequency response

No matter where you place the JBL OnBeat Rumble speaker dock in your room, it delivers a full-range frequency response of 50Hz – 18kHz. You'll hear every subtle nuance from all your audio.

Hear the truth.

JBL® ONBEAT RUMBLE™

The first powerful speaker dock designed for the iPhone 5 and iPad mini
